In this changing scenario, the control and spread of the pandemic depends on the effective adoption of many preventive measures, such as social distancing and quarantine. These measures are supported by government control and the cooperation of communities. Unfortunately, some patients do not accept quarantine even after a conversation with their doctor. They tend to believe that they are healthy and do not feel threatened by the virus. These patients also refuse self-isolation at home because they work in the same field. Thus, we have to consider the impact of quarantine on mental health care systems, which are highly stressed at the moment. According to the data of the Ministry of Health, Iran, on April 8, 2020, there were 233,445 confirmed cases and 20,116 deaths in Iran \[[@bib1]\]. The Ministry of Health has predicted that in July 2020, the number of new cases in Iran will decrease to 200--500 \[[@bib2]\]. Although quarantine measures in Iran are being completely

executed, some patients refuse self-isolation. How can these people be treated? COVID-19 is not a seasonal disease; it is an infectious disease that may cause multiple types of clinical manifestations. These manifestations include asymptomatic, mild, moderate, and severe forms. There are many factors that can influence the severity of the disease and clinical manifestations. Infection with severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) is a risk factor for disease progression to COVID-19 \[@bib3\]. a1d647c40b

## What's New In AutoCAD?

Auto-generated reference view windows: When you work on multiple views of a drawing, keep your references in sync. Just add a single reference view to your drawings, and the program automatically generates all the other view windows you need. (video: 2:30 min.) Connectors: A simpler way to move data between related entities. Connectors simplify how you link data, and make it easier to move your data around in your drawings. (video: 1:39 min.) Better Performance: AutoCAD 2023 offers improved performance in areas such as rendering and tracking. You'll experience fewer issues when you're working with larger models. (video: 1:17 min.) Save time and streamline your workflows With advanced features for markup import and import/export, model annotation, and data management, you'll be able to connect and collaborate with CAD specialists in your organization, no matter where you are.
