Folder Watch Dog Cracked Version provides you a security and privacy tool for your personal files, folders, and documents. With its help, you can assign passwords and access levels to folders, which will allow anyone else to access or view the folder's content with a pre-defined password, or disallow access completely. Folder Watch Dog also keeps track of the time an administrator has left the folder unprotected. With its help, you will not only be able to monitor the activity of the authorized and unauthorized users within your computer, but also you will be able to protect the sensitive information from people who have forgotten their passwords, hackers, spammers, or other unauthorized users. Folder Watch Dog has the following security tools: Security Filter – Create a list of specific names or files and folders, folders and files that can be accessed without the proper password, in order to filter those out or allow only the specified folders or files to be seen. Password Generator – Generate a set of randomly generated passwords that can be used to protect folders and files, and hide your personal data. File System Watcher – Monitor folders and files for changes (creation, change, deletion) and trigger an action accordingly. Time Tracker – Monitor the period when a folder or file is protected, to notify you when it is unprotected. Password Policy Wizard – Make your own custom password policy, without any additional software. Folder Watch Dog is completely free to use. This is a free version of the software that has no limitations in terms of space and file size. How to install and use Folder Watch Dog in your computer: 1. Install Folder Watch Dog to your hard disk: - Download the software here – - Open the folder where you have placed the downloaded files - Start the setup file. 2. Run Folder Watch Dog 3. Follow the setup wizard, and choose “Next”, and “Finish”. - The setup is complete when you can see “Folder Watch Dog is running.” - Now to access the folder watch dog, click on Start, “Open Folder Watch Dog”, and “OK”.
