The spinal cord and brainstem correlate with myelopathy and sensory and motor-cognitive manifestations in multiple sclerosis. We assessed brainstem and spinal cord volumes, and their changes after 1 year, in a previously untreated cohort (n = 25) of patients with relapsing-remitting (RR) multiple sclerosis and 10 controls. All patients were clinically and radiologically stable after 1 year. Patients had significantly higher brainstem volume and its change from baseline to 1 year compared with controls. Welcome back, my friends! This time around I'll be taking you back to a time when you were just a lowly guy driving a train. But you'll soon be inspecting tickets, then cars, and then luggage, and learning to rely on your gut feeling (and similar methods) to differentiate truth from a lie. It's a compelling job, and one that has both more subtlety and depth than the other jobs I've discussed in the past. You begin by accepting a job from the police, where they ask if you'll take care of an emergency situation. You're then assigned a car, and then a ticket inspector, a pair of shoes, and luggage. Everything is presented a little differently, ranging from the "peeking through windows" part of it to the hundreds of objects available for inspection. And if you've played past Papers, Please games, you'll recognize the critical difference: Ticket and baggage inspection are fully interactive. I quickly discovered that I had access to the people I'm dealing with, and that (as you might expect) that they're not just complete jerks. I can have a chat with them or press them for information, then treat the situation accordingly. During a session of ticket inspection, for example, I could talk to the person I'm inspecting, try to see if I could get a better deal, or just decide I don't want this job at all. It's a different kind of job, but it's a nice step toward getting back to the more situation-based missions. I was also able to share my failures and successes with the police, letting me learn from my mistakes and potentially get new jobs. Final Thoughts The question is, of course, how does it hold up when we compare it to the other games? In a word, well. It's not quite Papers, Please, but it's pretty close. It's also a pretty nice puzzle game in its own right. It's the sort of game that not only answers the questions I had about job simulators but also raises a ton of new questions of its own. While the gameplay is extremely similar to some previous Papers, Please games, it's also easy to see that developers Sega and Deep Silver worked hard to keep this away from that experience. It might not be the next Papers, Please by any means, but it's definitely a game worth checking out. "911 Operator" Gameplay Rating: 9 Good Platform: PC Developer: Tarsier Studios, Dejobaan Games
