U.S. Senate Committee Passes Same-Sex Marriage Bill The U.S.

Senate Judiciary Committee passed a bill ending the federal government's ban on same-sex marriages with the support of 11 Democratic senators, but eight Republicans voted against the measure. U.S. Attorney General Eric Holder announced in October that he would stop defending the Defense of Marriage Act in pending same-sex marriage cases. The U.S. solicitor general had been defending the law since the 9th U.S. Circuit Court of

Appeals ruled in August that the law, which denies married same-sex couples federal benefits, is unconstitutional. President Obama also directed the Justice Department to stop defending it. The Senate Judiciary Committee approved the bill on a party-line vote 11-8, with all 11 Democrats and Republican Sen. Lisa Murkowski of Alaska voting for the measure. Sponsor of the bill, Sen. Jeff Sessions, R-Ala., is a former federal prosecutor who has repeatedly described marriage as “a union between one man and one woman,” saying it is “a self-evident truth.” Most polls have shown overwhelming support for same-

sex marriage, and public opinion has shifted dramatically in

reserved.Q: Tables not getting
created after adding a new
column to the existing table I
have a table named 'fruits'
having 2 columns 'id' and 'name'.
So far everything was working
fine. Then I added a new column
'clarity' to the fruits table, and
then I am running the sql
commands, but it seems like the
new column "clarity" is not
getting added to the fruits table. I

am running the commands in some editor like Dreamweaver. I am running the following commands: ALTER TABLE fruits ADD clarity VARCHAR(100); alter table fruits add clarity varchar(100) UPDATE table SET clarity varchar(100); Please let me know if it is some other issue. Thanks. A: You shouldn't run the ALTER TABLE query before the UPDATE command. Move the ALTER TABLE to the end. ALTER TABLE fruits ADD clarity VARCHAR(100); UPDATE table SET clarity varchar(100); ALTER TABLE fruits ADD clarity VARCHAR(100); This syntax is acceptable as per SQL-92 syntax and it should work. MySQL does

support 'Before Update' and 'After Update' keywords.

However, I recommend that you use the syntax suggested by the manual. A: Are you using a frontend, like Dreamweaver? If so, it will prevent MySQL from storing the changes (as a temporary version) as it was created in a single statement.

With MyISAM, it's actually possible to use after update and before update, but in InnoDB that's not allowed. Use the following: ALTER TABLE fruits ADD clarity VARCHAR(100); AL
