The entire world of FIFA will be reworked in order to deliver a more realistic and immersive experience. FIFA has made world-class and professional players and teams the centre of the action. This allows these match-day heroes to do what they are famous for – move like they play. The state-of-the-art graphics and graphics engine featured in FIFA 20 has now been improved. Additional features include more realistic textures, improved lighting, reworked animations and ball physics based on a more realistic model. The fully integrated gameplay presentation has also been improved, featuring more transitions from gameplay to presentation, and also has new visual and audio effects. The core gameplay experience has been improved by more AI intricacies, better ball skills, more aerial duels and better set pieces. The ball physics improvements result in a quicker and more realistic ball feel, in addition to better ball control, which in turn results in better directional control and ball-balance. The number of AI team-mates is on average also higher. THE CHALLENGES AND TASKS just like real football, there are many challenges and tasks that players encounter in FIFA, which all lead to wins and losses. It's up to you whether to use your intelligence, your tactical awareness or your striker's best abilities to outsmart your opponents and win. As usual, all challenges and tasks are available from the start, and are divided into two categories: Defensive and Offensive. You can challenge your opponent by catching them out of position. Take advantage of the conditions and the simple opportunities that come your way – for example, by knocking the ball into the path of your opponent. FIFA 22 caters for a more realistic attack pattern in opposition territory, as the ball is more often played short and it's more common for players to pick it up in the final third of the pitch. For that reason, more realistic and genuine passing lanes are now available, such as on or along the sideline. Quick Hints For quick hints on all challenges and tasks, click here. For more information about the challenges and tasks, click here. 9 Player Tasks It's all about the game's best players. Whether it be the goalkeeper playing first touch and agility and then distribution with an assist for his team-mates, or the striker combining pace, trickery, ball-striking technique and finishing a hat-trick, if it

At its core, FIFA is a complete football experience, delivering authentic, single-player and online matches for players of all ages and skill levels, as well as realistic game features, animations and player interaction. The Fifa World Ball For the first time in FIFA's history, fans will control the pitch with the authentic FIFA World Ball. True to the brands' philosophy, the ball features improved aerodynamics, an enhanced surface and enhanced durability, meaning players can work harder to control the ball and make the most of their natural skills on the pitch. Every moment counts and this year the ball is crucial to players' performance, whether you're defending a one-on-one, or working on controlled passes. Also for the first time in FIFA, touch control features on the ball have been tuned so players can now perform a one-to-one tackle on the ball, use the right analogue stick to perform tricky dribbles or precise passes, or use the left analogue stick to take on-the-ball touches with the mind instead of the feet. Every touch counts, and all of these new features should make the player's first few touches in FIFA feel familiar yet comfortable. Working together to set up your attack, every moment on the pitch counts. Key Gameplay Updates In FIFA 22, the A.I. has been improved, so that players and teams can be more effective in your matches. The D-pad of the PS4™ controller enables players to intercept passes in more defined ways. You can now press "d-pad to pass" as a "normal pass", "d-pad to cross" as a "chipped cross" or "d-pad to dribble" as a "stepover" to press "d-pad to pass". The "chipped cross" pass can be performed by pressing the PS button, the "chipped cross" by the S button, and the "stepover" by the X button. Players have more precise options to carry the ball and utilize teammates, such as "button press to run to X" and "button press to initiate a pass". In FIFA 22, the ball feels much more agile thanks to the ball's new aerodynamics. The ball is more comfortable and gives the player more power and control, especially when attacking. When the ball is in a stable position, it will roll better than ever before.
