Enjoy the game as 3737 gameplay was achieved in 5 hours with a bit of help. It's a weird game because every platform so far seems to have significant differences, and a fair few issues. It's not a bad game at all, really. The dev decided to piss me off by adding an in-game shop for microtransactions. Sorry, but this is not going to be a big thing. The quality of the graphics are fair to middling. If you like farming, you might enjoy this. Otherwise, forget it, and go play something else. The music is great. The walk around the farm is weird, because the compass is broken, so you get weird directions when you follow the animal. There are 7 collectible animals to watch over, to level up, to collect. I just could not get passed the fact that none of the animals ever face the same direction. There's also a shop you're supposed to do. I had to actually read the text, and follow visual cues to know what was supposed to happen, and where to go to get the animal. It isn't horrible, but I don't think it's what I would consider a game-mastery kind of game. I like that there's a lot to do, but some of the items are very expensive, and you don't get a real sense of how valuable it is to you. The cost is high, and not the majority. I'm not sold on the real-world value of this if you can't put it in your bank. Idleon Fields is a pretty relaxing, relaxing, relaxing, relaxing, relaxing, relaxing game. It's not a bad game. We're hoping to get an iOS release sometime this year, but in the meantime, enjoy the game!
