However when the screen size is too small for the accordion to be full width and the accordion is showing the inner divs then as I click the arrow icon I want the accordion to close (as the only thing you can do is collapse the inner divs to hide the icons). What I don't want is the accordion to close on a mobile device but close on a desktop device. Can anyone suggest the best way to achieve this? A: To achieve this you need to inspect.collapse and.collapsing classes, currently they have only one child, the anchor element that hides the content. So what you need to do is to inspect the parent element and the parent element of the parent element and so on, until you find the element that has.collapse and.collapsing classes. When you found it, remove its styles. You can edit the class names to make the accordion behave as you want. Update To make it more clear, just remove all.collapsing styles from the element where you need to make the accordion behave as you need. Example: Title some content
