the hunter 2012 activation codeQ: Set Database I want to make my own database that is just a spreadsheet of my house. All my bills are on the last column. The first column shows a number and the other numbers are the bills that are number. Each column has to be 50x50=2550 cells. My question is: How to get all the items on the cell? For example get the cost for water, should be "water" and how much is it: "\$18.22"? A: This does the trick, see comments where I explain what is going on.
