Elton John Rocket Man Best Torrent

from the opening chords, rocket man takes on an almost gospelsounding feel. the song is, in a word, spectacular. the drums kick in and the song takes off. the lyrics are simple, and the message is clear: elton john has an identity crisis. the song is one of the most emotional he has ever written, it details his struggles with growing up, his disdain for his parents, and his difficulty with relationships. its a song about searching for yourself in a confusing world, johns band plays some instrumental scenes in the film, but i couldnt tell you what their instrument is. there is a percussionist, a guitarist, a bassist, and an electric violinist. i think i would have liked to see more of them in the film, as the set was guite distracting at times, especially in parts of the film that i thought would have a more visual element to them, like the fantasies and the concert scenes. i can imagine that some people would find the band distracting, but i felt like they were more of an asset than a hindrance. also, i found it distracting that john wasnt playing any of the instruments himself - i felt like they were clearly meant to represent him, and i would have liked to see him play something. in his first big screen role, taron egerton does a great job as elton johns elton john, but its his performance in the fantasy sequences that really steals the show, with some cool visual effects and some great performances from the likes of mcgueen, kristen wiig, hiam abbass and the london youth choir. did i mention that elton john has a wacky dream sequence where he does a concert in the subway? it doesnt hurt the film one bit.
