~REPACK~ Version**

---

however, you can also do the job of a coach. you can manage a training session, a training game or a match. you can also be in charge of the technical team, the first team, the youth team or the reserves. and you can also help out with the transfer market as well as the manager's office. with this, you can manage the season, the transfer market, the competitions, and even the player negotiations. it has a long list of features, including a full season simulation, a full season player career, or you can use the player career only if you choose. the game has a top-notch interface. i'm not going to go on and on and on about the decision-making process of the draft. obviously it's the same thing that we do in free agency. it's a decision-making process that we go through and we have our thoughts on how we feel like the draft went and then we go into free agency after the draft and we feel like the draft went well and go through our list of players we feel like we want to target and then we go out and try to add to our team. i don't want to get into the specifics of that. i think in free agency there's a little bit more unpredictability, but in the draft, i like to think that we can address a lot of our needs, we can address some of the areas that we've had to use our draft picks on. we have a good amount of free agency left, and we think we addressed some needs and we think that we've brought in some good players who are guys who fit the style of football that we play. i'm excited about it. obviously it's going to take a couple years for us to get where we want to be as a team and it's going to take a lot of hard work and a lot of dedication by everybody on this football team. we'll be able to look back on this day and remember that we were able to do something good today and then we go out to the second phase of the offseason and hopefully we'll be able to build on that.
