open itunes, click the "update" button on the top right. if you have itunes installed on your pc in the first place, you need to update itunes' status first. if you dont, just go to start > control panel > system > apple updates. 7.

sp_calculator is in use in main.asc file. issue started because firebug captures script and no longer runs, that is why application stopped working.

unfortunatly sp_calculator doesn't support loading multiple tpl files. you can use the downloaded file to run the application. it isn't a bug, rather a feature. use "remove" in firebug to clear old script to keep new script working.

you can use zippedcave to grab unzipped file from your firebug. incl key and full crack for may 2013 office 2011
