Developed by Justin King, it offers a simple and easy-to-use utility to adjust the settings of a webcam, including resolution, contrast, brightness, saturation, hue, sharpness and gamma. You can use the tool to preview the settings in real time, compare different resolutions, adjust the brightness, and more. The app also helps you optimize the video quality when using your webcam in Skype for Business, or any other video calling application. It can also help detect video compression settings, and reduce video quality. It also provides a microphone test to verify your microphone is working. This app is available in version 1.1.1. You can use it on Windows 8 and Windows 7. Webcam Settings Tool screenshot (v. 1.1.1): Webcam Settings Tool is a Windows application that will help you configure your webcam on your Windows computer. The software uses a simple control interface to enable you to adjust various settings of your webcam. The interface is rather limited but the software is easy to use and it will help you set the correct settings for your webcam. The main window shows you an overview of your webcam’s device, a list of the available webcams on your computer and the video preview with the settings you are about to configure. You can adjust a number of webcam settings by clicking on the settings link in the window. Below are a few examples of the types of settings you can adjust. Camera controls: You can adjust the camera controls by clicking on the camera controls link. You can adjust the settings for the following: To make your camera brighter or darker, click on the brightness link. You can adjust this setting in steps of 4. Clicking on the button will increase or decrease the brightness. The maximum value is 255. To adjust the levels of white, black and grays, you can click on the white level link. Adjust this setting in steps of 4. Clicking on the button will increase or decrease the levels of white, black or grays. The maximum value is 255. You can adjust the camera settings for the following: To adjust the hue of the color, click on the hue link. Adjust the hue in steps of 5. You can adjust the hue in the range between 0 and 360. Clicking on the button will increase or decrease the hue. The maximum value is 255. To adjust the sharpness of the image, click on the sharp
