Adobe and Apple offer Photoshop but a variety of subscription-based programs, which can enable you to get the latest versions and support. I think it's a little difficult to choose what subscription model will work best for you, since they all have advantages and disadvantages. For instance, are you one of those people who don't like updating programs too often? If so, the subscription might be better. You won't be forced to update (though of course you're free to update whenever you want to), but you have a low-risk plan with no cost for ongoing updates. As a choice, this model is probably more appealing than a yearly upgrade or the purchase of a bundle containing a disk as well as software online. Another consideration is how many options you have. Let's say you're an academic or a writer. If you happen to be, you might find that you can mostly work around the clock, and therefore an online subscription that is very affordable might work best. For me, the best model would be to rent a Smartphone on a one-time basis. That will let you continue using your software on your mobile device and will let you make changes with relative efficiency and without risking expensive updates. Join more than two million satisfied members worldwide who have discovered and selected software solutions from GetApp. These are all products that have been used for personal, educational and professional purposes. We have a very large database with quality software reviews. We work very hard to ensure that those reviews are up-to-date and added regularly. We also work with many of these software vendors to share information about their products, features, and any news and updates. However most reviews are written after sales support from the software is received. Early software versions often lack sufficient customer support in comparison to current versions. We are not always able to cover all software updates and we aim to cover the most common product updates. If you find a software review is missing, credit to the software vendor and we'll update the review. If you know of any software that does not have a GetApp review, please write to us.

This can be slightly overwhelming because there are a few different Creative Cloud plans to pick from according to what your area of interest is. To make things simple there are 3 different options that you will have to choose

from that include Photoshop. First the 'Photography' plan which is $9.99/mo and grants you access to Adobe Photoshop and also Adobe Lightroom which is a program that allows for detailed photo editing. This is a great value considering the second option is $20.99/mo for use of only Photoshop. The third and final option which I think is the best option is the Student and Teacher plan that is $19.99/mo and includes access to every Adobe program available. This is an amazing value because you get access to everything Adobe has to offer. From there you can learn and try new programs that Adobe offers to see what your favorite is.
