Solucionario ecuaciones diferenciales Isabel Carmona 417

A: Here is the output of the Iota profiler for your input. I'm not 100% on all of these numbers, but they are close enough to provide a rough picture. I'm not 100% sure that some of these are necessary as the output is very very long. This is what my output looks like. You can obviously play with the zk-assertions.time.1 (which I have set to 2 in this case), and the different zk-assertions.time.* settings to play with. I would recommend trying at least the first few configurations. ----- START OF IotaProfiler ----- Assertion name f988f36e3a
