
Advanced CSS Drop Down Menu Dreamweaver Extension [Win/Mac]

Advanced CSS Drop Down Menu is a powerful Dreamweaver extension that provides developers with the possibility to build appealing, professionally-looking CSS drop down menus. With the help of this utility, developers can completely automate the process of designing and managing both horizontal and vertical CSS drop down menus. The tool is based on the jQuery / Suckerfish CSS dropdown menu techniques and has been improved with JavaScript behaviors, runs ensuring that menus created with it can deliver a high level of compatibility across devices. Advanced CSS Drop Down Menu can be used to create snappy menus that are ready to work as soon as they appear on the page. These items also ensure smoother navigation and compatibility with a large number of browsers out there. The utility offers support for a series of optional animations, including roll, slide, and fade, and allows developers to modify the speed and direction of the animation. Moreover, the resulting menus can highlight the item to which they link so that visitors know where they are on the site. When creating new elements with the help of Advanced CSS Drop Down Menu, developers have the menu structure automatically saved separately from style and behavior. Moreover, they can ensure that the menu markup is HTML, XHTML and CSS compliant and that it can pass W3C and Dreamweaver validity checks. Advanced CSS Drop Down Menu provides a series of powerful features to let developers build fast and dynamic CSS drop down menus. Using this extension, designers can reduce the need to write any additional markup or JavaScript by allowing them to simply drop a menu on the page. It features multiple navigation styles to choose from, including horizontal, vertical, slide-in, and pop-up. These styles can then be applied to a specific element or as a full menu container that can then be shared across multiple pages. Furthermore, developers can select from a number of icons and HTML elements to appear on the menu and specify the menu to be built on the fly. Advanced CSS Drop Down Menu allows users to create child menus and include these in the parent menu. Moreover, the tool supports features like object grouping, multiple inheritance, roll-over effects, cross-browser compatibility, on-page styling, and partial support for JavaScript dropdown menus. Additionally, it lets users easily build CSS drop down menus in a responsive format. Using Advanced CSS Drop Down Menu, users can control the way menus look on mobile devices and web browsers by configuring the display as responsive or fixed. They can specify the height of the menu, too. With this Dreamweaver Extension
