It will start, but everything works somehow clumsily. What is the reason? Answer: When running the 64-bit version of Inventor in a 32-bit Windows XP Professional x64 environment, run the "regsvr32 c:\\inventor\\bin\\msi32.dll" command. If you don't currently have a 64-bit version of Inventor, you can use the following command instead: "regsvr32 c:\\inventor\\bin\\msi32.dll". After doing this, Inventor will run normally on Windows XP Professional x64 32-bit.
