At the funeral of Raymond Kennedy, a Republican senator from Delaware, President Trump offered his condolences and an eloquent tribute to Kennedy's service and his character. Trump also alluded to a conspiracy theory involving Kennedy's death, suggesting that the senator may have been assassinated because of his opposition to the president's agenda. There's just one problem: Trump's suggestion that Kennedy was murdered is false. For one, there were no assassination plots against Kennedy, according to the CIA. And for another, an exhaustive investigation conducted by the Federal Bureau of Investigation failed to find any evidence that he was killed for political reasons. The assassination attempt on Kennedy, which was carried out by Sirhan Sirhan, a Palestinian immigrant, occurred during a political rally in 1968, more than five years before Kennedy ran for president. Perhaps the clearest sign that Kennedy wasn't killed because of his political beliefs comes from the DNC — before the conspiracy theorists on the left get too wound up. While most Democrats — including Kennedy — have long discredited the idea that the assassination was related to his opposition to the Vietnam War, a select group has remained steadfast. They've continued to insist that Kennedy was killed because he stood in opposition to the policies of the Nixon administration. Kennedy did, after all, receive a number of threats before the assassination. The Clinton campaign even latched on to the idea to motivate voters. After the election, Hillary Clinton claimed that the sense of peace and hope in the country following Kennedy's death was foreshadowing her triumph. The FBI's exhaustive investigation found that the likelihood of Kennedy being murdered because of his political beliefs was "exceedingly remote." "Sirhan Sirhan's gun misfired," Sam Shaw, a spokesperson for the FBI, told us. "There were no bullet holes in the body. There was no bullet in Sirhan's gun that was used." Charles Manson wasn't involved in the assassination attempt. The sheer number of people involved in a plot to assassinate a sitting Democratic senator makes this false theory noteworthy.
